SUMMARY

6th-semester Information Systems student at Universitas Nasional with a strong academic record (3.81/4.00 CGPA). Highly motivated and adaptable individual with excellent problem-solving and analytical skills. Demonstrated ability to work effectively both independently and as part of a team. Detail-oriented, disciplined, and committed to delivering quality results. Eager to learn, grow, and contribute positively to organizational goals in a dynamic professional environment.

EDUCATION

SMA 51 | Mathematics and Natural Sciences Major

2019 - 2022

This major teaches calculations that assist in the field of business management for calculating expenses and income.

Universitas Nasional | Information Systems Study Program

2023 - Present

This major covers two prepared fields: business management and Informatics (IT). In this major, I am prepared to be capable in both the business world and Technology.

Work experience

Data Enrtry I Freelance Pt Indoarsip

Desember 2025 - Januari 2026

- Engineered and maintained a centralized digital repository for 200+ corporate documents using Google Drive and Microsoft Excel, implementing structured folder hierarchies and version control to streamline records management.
- Standardized document indexing, metadata tagging, and role-based access permissions, significantly improving searchability and reducing retrieval time for cross-functional teams.

ORGANIZATIONAL EXPERIENCE

INPARTS I Anggota I SMA 51

2020

- Designed and managed detailed event rundowns to ensure structured workflow, timely execution, and alignment with operational targets.
- Administered organizational budget, including cost planning, daily expense tracking, and preparation of financial accountability reports.
- Collaborated across departments to coordinate schedules, logistics, and resource allocation for seamless event delivery.

- Sourced and established strategic partnerships with sponsors and vendors to support the student association's programs and activities.
 - Managed the end-to-end planning and execution of organizational events, ensuring all activities were delivered effectively and met targeted objectives.
 - Successfully organized and executed a Data Analytics competition in collaboration with Zenith as the primary vendor, overseeing event logistics and vendor relations.
 - Led and coordinated project teams, fostering solid collaboration to ensure seamless event operations.
-

ACADEMIC PROJECT

Logistics Management Website | React.js, Tailwind CSS

2025 - 2026

- Designed and developed a responsive web application for shipment tracking and operational management using React.js and Tailwind CSS
- Implemented core features including real-time package tracking, inventory control, and an interactive admin dashboard
- Applied UI/UX best practices to deliver an intuitive interface with optimized performance across desktop and mobile devices

Mobile Ticket Booking Application | Flutter, Dart

2025 - 2026

- Developed a cross-platform mobile application for event ticket booking using Flutter and Dart
- Integrated key functionalities including user authentication, schedule search, seat selection, and simulated payment flow
- Implemented effective state management to handle dynamic data and ensure smooth, lag-free user interactions
- Conducted systematic testing and debugging to guarantee app stability and compatibility across Android devices

Store Sales Performance Dashboard | Tableau

2025 - 2026

- Processed and structured store sales recap data for the fiscal year 2025.
- Designed and deployed interactive Tableau dashboards to track daily/monthly sales performance and identify top-selling periods.
- Translated complex retail datasets into intuitive visual representations for easier business tracking and strategy planning.
